Chairman Message

Electronic products play an important role in our daily life and now is a day that has become a basic need of the people. Even then, no one would think of making a name for themselves in the modern digital world without an electronic product. Considering this importance, we established an electronic company in Bangladesh in 2005 which is currently one of the top importer of electronic products in the country. The world is changing rapidly. In order to deal with the trend of rapid change we need to adjust ourselves to the changing pace. With this vision in mind, we have established industry to participate in the industrialization process for economic development and to create employment opportunities in the industry by importing high quality electronic products without compromising on the quality that meets the basic needs of the people.

Our activities are being carried out to replace the imported products by importing and supplying more quality products at reasonable prices. Our goal is growth through creativity and Innovation addressing social, economic and environmental justice. We are equipped with very strong research and development branches in compliance with both national and international regulations. We fulfill our corporate social responsibilities in accordance with the highest priority of human life and protection. We strive to promote CSR management as a loyal citizen of the country to maximize our corporate values. We care about the values of our employees as well as clients.
